

GROWING TIMBER WILL PAY WELL

Farmers Owning Small Tracts
Will Find It Advantageous to
Market Crops Together.

CASE IN NORTHWEST CITED

When Care Is Exercised in Selecting
and Cutting a Woodlot May Be
Made Source of Income for an
Indefinite Period.

With the help of the Forest Service and the county agent, a number of farmers who live in the Houghton Valley, Wash., just north of the Puget Sound, are operating this year in the sale of about 300,000,000 feet of timber.

Last fall the Forest Service was requested to assist these farmers in disposing of a considerable amount of timber on their claims. It developed that there were approximately 200 settlers who owned about 300,000,000 feet of timber which they desired to dispose of as a unit in order to attract some company capable of handling the entire proposition. They were, however, unable to agree upon a satisfactory price. The project had been worked up by the local county agent, a former Forest Service man, from whom the request for help came.

Not Needed for Crops.

The Forest Service agreed to make an appraisal of the timber and to see that in drawing up a contract and sale conditions. The appraisal was made last spring and a price of about \$2.50 per thousand feet. Although the land is well adapted to agriculture, it will not be possible for the owners to put all of it into cultivation for a number of years. Consequently it is to their advantage to devote it to growing timber until such time as it is needed for raising crops.

The stand consists of yellow pine of a good quality and contains a large number of trees just below merchantable size which will mature rapidly. It is distinctly a case where it will pay the farmers to grow trees. These facts were explained to the members of the association and they quickly saw the advantage of handling the forest in the manner recommended.

RATS CAUSE ENORMOUS LOSS

Damage in Minnesota Estimated at \$12,000,000 Annually—Also Spread Disease.

Entomologists of the department of agriculture of the University of Minnesota say that Minnesota's financial loss from the depredations of rats is from \$10,000,000 to \$12,000,000 annually. State directors of agricultural extension work have estimated the losses in Montana at \$15,000,000 to \$20,000,000; in North Dakota at \$8,000,000 or more; in Kansas \$12,000,000; in California \$20,000,000 and in Wyoming and Nevada at from \$10 to 15 per cent of the value of all crops.

"In addition to this monumental loss of food products," says F. W. Wabers of the division of entomology, University Farm, "rats spread disease, and efforts are being made by our state and city health boards to reduce the number of these dangerous and destructive animals."

"Every citizen of Minnesota should feel the responsibility of doing his or her part by making new buildings rat-proof and by eliminating rubbish which harbors rats, as well as by active campaign leading to their destruction by trapping and poisoning."

Farm Woodland After Thinning.

In order to save the young growth they agreed to sacrifice 30 cents per thousand on the stumpage price.

PREVENT SPREAD OF DISEASE

Of Greatest Importance That Carcasses of Dead Animals Be Buried or Burned.

When it is considered that the spread of anthrax may be distributed to live stock through the feces of cats, dogs, chickens and flies it is more readily apparent that carcasses of animals dead of disease should be buried as speedily as possible. Most of these disease carriers come in close contact with the larger domestic animals and thus the direct transmission of germs from their body surfaces is possible and also it is known that they are more than likely to contaminate water courses. It is possible that many cases of anthrax may be attributed to the common house fly.

LUBRICATION FOR MACHINERY

One of Biggest Things About Farm Machinery Is Always Cheaper Than Grease.

Lubrication is one of the biggest things about farm machinery, and the faster the machinery runs the more important lubrication is. If you let your machine run dry, it will stop. If you will have little service trying to make a tractor do good work and stand up to the hard or very long work, it is always cheaper than grease. Use Oil.

WEED SEEDS HARM WOODLOTS

Just as Important to Eradicate Noxious Plants There as It Is in Any Family Garden.

It is just as profitable to remove weed seeds from the woodlot, as it is to weed the garden; besides you can burn the wood from the crooked, defective trees, and from those that are not good timber species.

FARMER NEEDS LETTER-HEAD

One of Neat and Attractive Appearance as Important as It Is for Progressive Merchant.

The progressive farmer needs a neat, attractive letter-head for his business correspondence just as badly as the progressive merchant or other business man needs one. It is also one of the best advertising projects available.

Record of Farm Business.

A few minutes given at a definite time each day will keep a record of the farm business, and with accurate figures at the end of the season a man can see at a glance where he is making money and where he is losing it.

Roadside Tree Planting.

Roadside tree planting had best not be in formal rows, but in groups of a specimen tree at irregular intervals. Street trees should be in straight rows of the same species for ten or twelve blocks.

WAR ON MOLES NETS PROFIT FOR FARMER

Fur of Animal Found to Be of Considerable Value.

Annual Damage by Rodents to Crops and Grain in the United States is Roughly Estimated to Amount to \$300,000,000.

Mole skins obtained from animals killed in the crusade fostered by the biological survey, United States Department of Agriculture, against crop destroying animals have netted \$50,000 to \$60,000 a year to farmers of Oregon and Washington. Moles and the many kinds of rodents do serious damage to grass and grain, and a campaign of extermination was started against them through the co-operation of the biological survey and the states relation service. As a by-product of extermination the fur of the mole was found to be of value. The pelt of the northwestern mole is superior to that of the Scotch mole, which is generally used for fur garments.

Some American Moles Are Larger and Have Finer Pelts Than the European Species.

Which New Furriers Buy for Bulk of the World's Supply of Mole Skins.

ernally used for fur garments. The northwestern moles have recently sold at from \$10 to 50 cents apiece and have been in great demand.

The total annual damage by rodents to crops and grains in the United States is estimated roughly at \$300,000,000. This is being cut down by systematic poisoning campaigns in various sections. The territory covered in these campaigns in the last year amounted to about 34,000,000 acres. The saving to crops in the destruction of moles and of such pests as prairie dogs, ground squirrels, pocket gophers, and jack rabbits is estimated to be \$10,000,000 a year.

COMMERCIAL

Weekly Review of Trade and Market Reports.

BALTIMORE.—Wheat—Sale of bag lots of nearby wheat, by sample, at \$1.55@1.70 per bushel.

Sales of cargoes on grade at \$1.80 per bushel for No. 4 red winter, garlicky, and \$1.75 for No. 5 red winter, garlicky, and \$1.65 for No. 3 red winter, garlicky.

Corn—Track yellow corn, No. 2 or better, for domestic delivery, is quoted at \$1.10 per bu.

Cob corn, new, because of its heavy moisture content, is selling at around \$3.75 to \$4 per barrel for prime new yellow arriving here by wagon or truck at \$1.10 per bu.

Oats—No. 2 white, 65c; black, No. 3 white, 63c.

Rye—No. 2 Western, export, spot, \$1.75; bag lots nearby rye, as to quality, \$1.85@1.90.

Hay—No. 1 timothy (nominal) \$23.50@24.00; standard, \$23.00@23.50; No. 2 timothy, \$22.50@23.00; No. 3 do \$22.00@22.50; No. 1 high clover mixed \$20.00@20.50; No. 2 light do mixed \$22.00@22.50; No. 1 do mixed, \$22.00@22.50; No. 2 do mixed, \$22.00@22.50; sample hay \$20.00@20.50.

Straw—No. 1 tangle rye, No. 1 do do, \$16; No. 1 wheat, \$14.50@15; No. 1 do do, \$13.50@14; No. 1 oat (nominal) \$13.50@14; No. 2 do, \$14@15; No. 3 do, \$14@15; No. 4 do, \$14@15; No. 5 do, \$14@15; No. 6 do, \$14@15; No. 7 do, \$14@15; No. 8 do, \$14@15; No. 9 do, \$14@15; No. 10 do, \$14@15; No. 11 do, \$14@15; No. 12 do, \$14@15; No. 13 do, \$14@15; No. 14 do, \$14@15; No. 15 do, \$14@15; No. 16 do, \$14@15;
